

MyPBX

The All-in-One Business PBX with Advanced Features and Low Cost Calls

- ✓ Fully Featured Hosted Phone System
- ✓ Easily Managed Online
- ✓ Music on Hold and Hunt Groups included
- ✓ Flexible Auto Attendant
- ✓ Voicemail-to-Email & Fax-to-Email
- ✓ Direct Indial Numbers
- ✓ No long Term Contracts
- ✓ Customise Features according to User Needs:
Standard, Mobility, Executive
- ✓ NO Line Rental Costs
- ✓ FREE Inter-Office Calls
- ✓ Flat Rate Local & National Calls

Grow as you Go Simplicity

MyPBX is a monthly licensed service, meaning there are much smaller upfront costs to purchase a new PBX, allowing you to keep capital expenditure for other business needs. Licenses for the system will increase and decrease with you, so scalability of this system is perfect for Australian businesses.

Huge Savings on Call Costs

If your staff call between offices frequently, or you have teleworkers in different locations, then those calls are FREE which will save a huge amount on your monthly phone bill whilst enhancing productivity and maintaining excellent call quality. And with flat rate local and national calls, staff can talk for as long as they like, without you feeling the pinch.

Features that Enhance Productivity

MyPBX offers all the advanced features you would expect from a traditional PBX but with some exciting differences. You can manage your personal calling profile via our Web Assistant plug in, which will help you automatically field calls to mobile or voicemail. The Remote Office allows you to use your mobile just as you would use your desk phone, dialling other extensions, transferring calls internally and hold 3-way conference calls.

Lower Maintenance Costs

Unlike traditional PBXs, a maintenance visit to your office isn't required anymore as all changes can be easily performed online, and completed within seconds, not hours. No costs for maintenance agreements, no waiting for technicians.

Plan Options

Hosted PBX	User Licence Options	User Feature Options	Inter-Office Calls	Local Call	National Call	Calls to Mobile	Calls to 13 Numbers
\$12 per month	Standard \$10	Fax-to-Email \$7	FREE	10c per call	10c per call	22c per min	33c per call
	Standard with Mobility \$15	Web Assistant \$6					
	Executive \$17	Conference Centre \$7					

All prices quoted above Inc GST. Auto Attendant + \$16 per month, Hunt Groups FREE, Number Porting \$100 per Block per Address

MyPBX

How it Works

The below diagram shows the ideal way to create a dedicated network for IP Voice within your office. Of course, every office has different networking requirements, involving both your computers and IP handsets, but we can help advise on the best network to accommodate both your voice and data requirements.

Why Choose Us?

Because we give the kind of service you just can't get from the big telcos.

One Bill

We're a full service telecommunications provider meaning we can provide all your communications on one single bill. So that's one simple payment per month and one company to deal with. Just makes life simple.

Direct Contact

When you're with us you'll have our direct contact details so if you've got a question you know who to come to. It's the kind of personal service the big telcos just can't offer. Their loss, your gain.

Choice of Networks

We know reliability is crucial, it's just got to work. So we only partner with the tier 1 networks so you get the service you're paying for, in more places. And better still, we can offer the network that suits you, not us.

A Communications Partner

We believe in being a valued partner to our clients by offering honest and straightforward advice. We don't make the sale and run, we're here to stay, and we're here to do whatever we need to keep you happy.

Things You Should Know

1. In order to access the Service, you: will need a dedicated fixed line broadband Internet connection, such as ADSL 2+; will need an IP Phone; may need extra hardware depending on your set up e.g. router, switches. 2. We recommend that the Service be accessed with hardware supplied or approved by us, using a broadband ADSL or SHDSL service supplied by us to our specifications. The Service is designed to allow users to bring their own device, but we do not offer any guarantee or assurance that all devices will be compatible and function with the Service. 3. The broadband speed required for the Service will depend largely on your network demands. Data transmission demands on your network may cause the bandwidth available for voice transmission to be limited if voice and data share the same connection. 4. Extra charges will be incurred for freight for any hardware.
